\$\$\$ SAVER

The San Francisco Unified School District implemented a program that included HEPA filtered vacuums, new mopping systems, entry mats and custodial staff training. Prior to the project, these schools received numerous complaints of respiratory problems and requests for periodic deep cleaning. Since the project was initiated, such complaints or requests have been eliminated.

Industrial

Industrial upright vacuums are as heavy-duty as their name implies. Choose for heavy-duty cleaning in offices, government buildings and hotels. Select a vacuum with a wide cleaning path to clean large, minimally furnished rooms in less time; other widths are available for other layouts. A great choice for day cleaning, quiet operation features are a real advantage. Look for large-capacity shake-out bags or dust cups and extra-long power cords to maximize cleaning efficiency, save time and reduce maintenance. *(pages 252-253)*

Filtration

Choose HEPA uprights to improve indoor air quality. A HEPA vacuum filter or bag retains 99.97% of allergens as small as 0.3 microns – or about 240 times smaller than a human hair. Items with HEPA classification range from vacuum filters and disposable dust bags, to completely sealed systems that force all of the air leaving the vacuum through a HEPA exhaust filter. Hospitals, schools and certified green buildings are ideal environments for HEPA cleaners. *(pages 249-253)*

Lightweight

A lightweight vacuum is built for quick, frequent cleanups and maneuverability. In spaces with furniture and other obstacles, this type is ideal for hotels, doctors' offices and schools. Choose from options such as cordless sticks and compact deep cleaners that deliver the same powerful performance of a full-sized machine. Many lightweight cleaners offer superior filtration, onboard tools and carpet height adjustment controls. *(pages 250-251)*

Backpack

Backpack vacuums offer mobility as well as quiet operation. Back and shoulder straps secure the cleaner to the maintenance worker, adding to comfort and ease of carrying. Choose closed bag systems and highly effective multi-stage filtration, in which multiple layers of material thoroughly remove soil particles. HEPA filtration renders a backpack vacuum appropriate for environments where indoor air quality is a concern. Many models are surprisingly lightweight. Use in spaces with large expanses of bare floors and areas containing an abundance of furniture such as office buildings, schools and hospitals. *(page 257)*

Canister

Canister vacuums are flexible and compact, making them ideal to reach into inaccessible areas that are often hard to clean. Easy, powerful detail cleaning is enhanced by attachments including upholstery tools, dusting brushes and wand extension. Models with shoulder straps transport more easily and HEPA-ready units help improve indoor air quality. Choose canister cleaners for spaces that demand detail cleaning and those with an abundance of hard surfaces and stairs, such as schools, hospitals, hotels and office buildings. *(page 256)*

Carpet Extractors

Carpet extractors come in many shapes and sizes, from spot cleaners to full-size models with powered brushes to deep-clean large carpeted areas. Features like revolving brushrolls, fingertip controls, metal cleaning wands and large-capacity solution tanks add value. Ideal for use in spaces with high-traffic areas like offices, hotels and government buildings. *(pages 259-260)*

Floor Machines

Get hard surfaces to shine in high-traffic areas in schools, government buildings and hospitals. These units are designed to maintain and restore hard floors with the use of different pads or brushes for scrubbing, stripping, buffing or polishing. For this heavy-duty work look for quality construction. UL Approved models offer durable steel gears and parts. Smooth operation features, multi-speed motors and a safety shutoff switch, add to ease of use. *(pages 262-263)*

Why Choose A Backpack Vacuum?

Commercial backpack vacuums provide excellent mobility while being comfortable and easy to carry. Perfect for hard-to-reach places, the backpack vacuum is all about versatility. It is equipped with a wide variety of attachments to make carpet and bare floor cleaning a seamless process. Backpack vacuums operate quietly and can cover larger areas such as stairs, as well as tight spaces where bulkier vacuums can't fit. These vacuums are the perfect companion for dependable, quick cleaning and touch-ups. Ideal for healthcare facilities, schools, hotels, foodservice, office buildings and more.

Low-Speed

**3M****LOW-SPEED FLOOR PADS****A. Scotch-Brite™ Surface Prep Pads**

Requires only neutral cleaner or water to effectively remove floor finish, preparing the floor for finish application. For vinyl tile, marble, terrazzo, concrete and other floor types. No need for harsh chemical floor strippers.

B. Scotch-Brite™ Purple Diamond Floor Pads

Unique diamond mineral construction that simultaneously cleans and polishes marble, terrazzo, slate and polished concrete flooring to bring it to a high gloss.

C. Scotch-Brite™ Sienna Diamond Floor Pads

For use on dull floors to help condition the floor and bring it to a low/medium gloss.

D. High-Productivity Stripping Pad 7300

For heavy finish build up, quick stripping and stain removal.

E. Black Stripping Pad 7200

The industry standard. Maintains consistent high performance throughout the life of the pad.

**F. Brown Stripping Pad 7100**

For wet/dry stripping. Prepares floors for recoating. Conforms to uneven floors.

G. Blue Cleaning Pad 5300

For heavy duty scrubbing prior to recoating, heavy duty spray cleaning or foam scrubbing.

H. Red Buffing Pad 5100

For spray buffing. Cleans when damp; buffs when dry. Cleans and removes scuff marks.

I. White Super Polishing Pad 4100

Spray or dry buff on soft finishes. For polishing wood floors. Removes black marks up to six times faster, which can lead to less energy usage from burnishing equipment.

J. TopLine Autoscrubber Pad 5000

For light scrubbing with autoscrubber prior to burnishing. Excellent daily cleaning pad. Removes black marks up to six times faster, which can lead to less energy usage from burnishing equipment.
